

The Heavyweight™ Wattle

Specification Sheet

Item: WW4.5-12-SB

Description: 4.5" x 12' synthetic fully rebound foam wattle designed to be connected together to form a continuous barrier, highly resistant to construction traffic and elements. Designed to maintain a consistent barrier height, eliminate undermining while directing the flow of water through a #40 US SIEVE, 100 GAL/SQ.FT. Filter fabric.

Materials: Outer Cover 6.2-oz, high tensile strength, UV Stabilized, 100% polypropylene monofilament filter fabric, #40 US SIEVE, 100 GAL/SQ.FT.

Full Rebound Inner Core: Made from flexible Polyurethane covered in a Polyethylene film.

Estimated Flow Rate for Installed Wattle: .7 gal / ft / min

ASTM D7351: 96.6% soil retention effectiveness

World Textile and Bag, Inc. (**WTB**) warrants its products to be free from manufacturing defects for 90 days from the date of sale. Any liability during this 90 day period is limited to the cost of the effected products via refund, price adjustment, repair or replacement of the product by standard ground or ocean freight. However, since physical conditions vary from jobsite to jobsite and even within a given jobsite, WTB makes no performance guarantees and assumes no obligation or liability for the reliability or accuracy of information contained herein, for the results, safety or suitability of using our products, or for damages occurring in connection with the installation of any erosion control product whether or not made by WTB or its affiliates, except as separately and specifically made in writing by WTB.
